B Tag the persons in each photo to identify who they are.

1. If your photo is already open in Memories, skip to the next step; otherwise, go to the Person page for an ancestor, click the **Memories** tab, and then the **Photos** link. Then click the photo to open it. Or, you can open the photo in the Gallery. Note that untagged photos have exclamation points to remind you about tagging.
2. Click on a person's face in the photo you want to tag.
3. Drag and size the picture frame that appears until it surrounds the head area in the photo.
4. Click the "Who is in this memory?" box, type the person's name and then select it from the list that appears. The name will appear in the tag list (upper right). Or, if none of the names is a match, select "Add New". In that case, the name also appears in the tag list but with an **Attach to Family Tree** button you can use to add the new person in Family Tree.
5. Click **Save**. Now when you move the mouse over that person in the photo in Memories, the Tag appears with the person's name.
